

TECHMOUNT®

Universal Adaptor Plate

Top View

Installation Instructions:

The universal adaptor plate shown above is designed to provide an easily removable mounting interface between a variety of mounting brackets and the TechMount standard top plate. Simply attach the cradle or mounting bracket to the Universal adaptor using the mounting holes that align with the holes in the cradle or mounting bracket. Install the screws and locknuts as needed. Now simply attach the adaptor plate to the top of any standard TechMount top plate with the supplied thumb screw and lock washer. (As shown above)

Use holes marked (1,3,4,9) for AMPS bolt pattern devices such as Garmin GPS cradles, Magellan GPS units, XM and Sirius satellite radio.

Use holes marked (2, 5, 6, 7, 8, and 10) for R.A.M. device cradles.
